FOR IMMEDIATE RELEASE

### **LUXURIOUS AMERICAN TRAIN VACATIONS NOW OFFERED**

Granbury, Texas, October 4, 2017 - America's Trains Inc. (ATs) is now offering scheduled all-inclusive Journeys by Rail on luxuriously rebuilt passenger 'cars' that will travel with Amtrak and regional railroads throughout the US and into Canada.

Journeys are normally for eight days and seven nights. The routes travel from San Antonio to Chicago, then to Portland, Vancouver (Canada) returning to Seattle, Los Angeles, San Francisco to Chicago, Montreal returning to New York, and then to Miami. Journeys include visits and shorter trips to Glacier National Park, California's wine country, San Diego and other places. Cars are dropped off and park at appealing en-route destinations to allow passengers to live on board while they enjoy an extensive choice of local off-car attractions and activities, without moving to and from a hotel.

The company's CEO, Barry Jones, stated that "Our capacity to book initial Journeys will quickly increase as car improvements are finished and they enter service on an expanding number of itineraries. We will have about 42 passenger plus additional private and other service cars within the first several years."

Individual (single) vacation Journeys by Rail fares are lower than prices of comparable luxury foreign (there are no others in the US) train vacations.

ATs also offers Train'Shares (timeshares) that include frequent Journeys that can be exchanged for luxury resort vacations worldwide. Owners have unique rights not normally attached to typical timeshare ownership. If they don't use Journeys no maintenance or other fees have to be paid. Train'Shares retain a resale value, and ATs will buy them back at any time after a first Journey is used.

America's Trains Inc. ("ATs") provides unique, luxurious Journey by Rail vacations throughout the USA and into Canada, with intriguing en-route layovers where passengers live on board while enjoying endless local activities and attractions. ATs rail cars are not older units with new paint, fixtures and furniture. They are fully redesigned, rebuilt and refurbished to exceed Amtrak's mechanical specifications, with interior amenities that retain classic features and provide utmost passenger gratification.
